

Kurir

Tutus file encryption software. Transfer sensitive documents, files and folders securely.

Tutus is a comprehensive cybersecurity company specialized in information and network security, with a strong focus on encryption. Founded in 1992, we develop high-end solutions for mission-critical organisations that require reliable protection for classified information at the Restricted level.

Kurir

Tutus file encryption software. Transfer sensitive documents, files and folders securely.

Kurir is Tutus file encryption software. With an intuitive interface and drag-and-drop functionality, users can easily encrypt and decrypt files, while the built-in key management makes it simple to create and protect encryption keys.

- User-friendly
- Emergency key deletion
- Supports different roles – administrator and user
- No additional hardware required
- Black keys for secure distribution
- Password generator with Diceware support (passphrases)
- Supports Windows versions 7 (SP1) and 10
- Easy deployment through support for the MSI procedure (Microsoft Installer)

Transfer sensitive documents, files and folders securely. Whether via email, Dropbox, USB or other channels, Kurir provides high assurance and is evaluated and certified according to Common Criteria EAL 3. The software uses symmetric keys for encryption, AES 256-bit, protecting encrypted files against unauthorized access and tampering.
