

Färist Link H320

Färist Link enables secure, high-capacity data transfer for reliable communication even with large data volumes.

Tutus is a comprehensive cybersecurity company specialized in information and network security, with a strong focus on encryption. Founded in 1992, we develop high-end solutions for mission-critical organisations that require reliable protection for classified information at the Restricted level.

Färist Link H320

Färist Link enables secure, high-capacity data transfer for reliable communication even with large data volumes.

Secure high-capacity data transfer

Färist Link is a VPN solution designed to transfer large volumes of data securely and reliably. It delivers high performance even under heavy traffic and when availability requirements are critical.

For mission-critical data flows

Färist Link is ideal for organizations where integrity and availability are essential, such as government agencies, public authorities, and industrial operators. It manages continuous data flows between networks and data centers without compromising speed or uptime.

Security first

Färist Link is built with a robust security layer, featuring strong encryption, strict traffic segregation, and secure key management. The solution is designed to maintain high security and data integrity while ensuring consistent performance.

Easy deployment and management

Centralized administration through Tutus management tools, policy-based configurations, and clear monitoring make it simple to deploy, scale, and manage the system in a predictable and efficient way.

Färist Link H320

- **Ports:** 2 × RJ45, 8 × SFP+, 4 × QSFP28 100Gbps, 1 × RJ45 console, 2 × USB
- **Encryption:** 100 Gbit/s MACsec
- **Power supply:** Dual 100–240V AC
- **Power consumption:** 690W nominal, 750W maximum
- **MTBF:** 111,837 h
- **Dimensions:** 2RU, 88 × 430 × 450 mm (HxWxD)
- **Weight:** 13 kg
- **Other:** High-performance model, carrier-grade, rear-mounted fan, display
