

## Skiffer

Skiffer is a secure video conferencing service designed for handling sensitive information.

Tutus is a comprehensive cybersecurity company specialized in information and network security, with a strong focus on encryption. Founded in 1992, we develop high-end solutions for mission-critical organisations that require reliable protection for classified information at the Restricted level.

# Skiffer

Skiffer is a secure video conferencing service designed for handling sensitive information.

Organizations that handle sensitive information must be able to operate efficiently without risking that their data or personal information falls into the wrong hands. For this reason, Tutus has developed a video communication service with enhanced security.

The solution is designed to support organizations with specific requirements for handling sensitive information in their video conferences.

Skiffer has been reviewed and approved by a Swedish authority for the protection of sensitive information.

- All data stored in Sweden, in a secure data center within a protected facility
- Development and operations handled by security-cleared Tutus personnel
- No software installation required – works directly in the browser
- Strong authentication with approved e-identifications
- Lobby feature, breakout rooms, screen sharing, and recurring meeting functionality
- App available for both Android and iPhone
