

Vegas

Tutus secure client for handling sensitive information, without compromising the user experience.

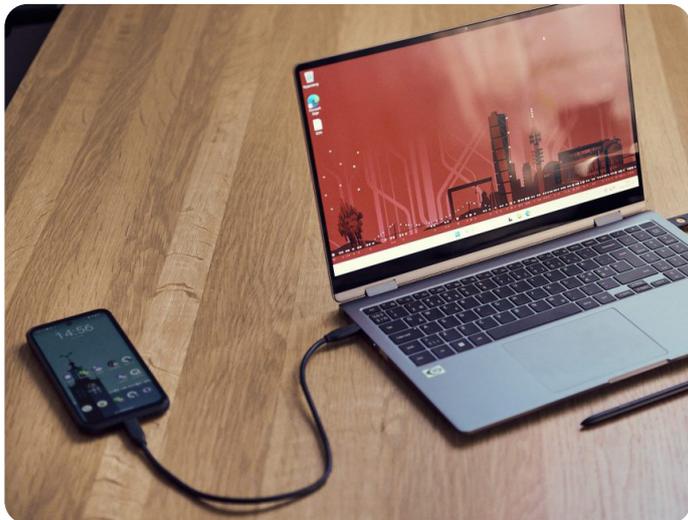

Tutus is a comprehensive cybersecurity company specialized in information and network security, with a strong focus on encryption. Founded in 1992, we develop high-end solutions for mission-critical organisations that require reliable protection for classified information at the Restricted level.

Skiffer

Skiffer is a secure video conferencing service designed for handling sensitive information.

Tutus secure client, Vegas, ensures that your information remains protected while delivering an excellent user experience. Vegas features multi-factor authentication for an additional layer of security. Use smart cards or security keys to ensure that only authorized users can access classified information. We put control in your hands.

Built to protect sensitive information

- **Robust hardening and compliance** – Vegas is hardened to the highest standards to ensure your information remains secure and protected. It meets the requirements of KSF 3.1 and STIG.
- **Multi-factor authentication for enhanced security** – Security is our top priority, and Vegas offers multi-factor authentication to add an extra layer of protection. Use smart cards or security keys to ensure that only authorized users can access classified information. We put control in your hands.
- **Efficient updates** – Keep Vegas up to date and secure with simple update management. Connect your Vegas device to Färist Mobile or Micro for seamless and fast updates. Our goal is to make security updates as smooth and straightforward as using Vegas itself.
