

Skiffer

Secure video conferencing for
critical operations.

Tutus is a comprehensive cybersecurity company specialized in information and network security, with a strong focus on encryption. Founded in 1992, we develop high-end solutions for mission-critical organisations that require reliable protection for classified information at the Restricted level.

Skiffer

Secure video conferencing for critical operations.

The operations of critical public sector organizations must be carried out efficiently, without risking unauthorized access to sensitive information or personal data. That's why Tutus has developed a secure video communication solution.

The solution is designed specifically to support organizations that handle sensitive or classified information in their video conferences.

Skiffer has been reviewed and approved by a Swedish government authority for the protection of classified information.

For organizations with higher security needs, encryption with Tutus' Swedish Armed Forces-approved solutions for the level Restricted is also available.

Contact us for more information.

- Swedish data. The data center is security-classified and located within a protected facility in Sweden.
- Tutus is registered as a security-sensitive operation.
